Re: Recognition of Chronic Homelessness Reduction in the Built for Zero Canada Campaign

Hello Team Moncton!

On behalf of the Built for Zero Canada team, I want to recognize and congratulate you on the progress you have made thus far on your journey to end chronic homelessness! The first key milestone communities in the Reduce Cohort work to achieve is to reduce 10% below baseline on the number of people experiencing chronic homelessness. Moncton has reached this goal!

In April 2021, your team confirmed a baseline month of February 2021 with 147 people experiencing chronic homelessness in Moncton. Communities set a baseline once they have achieved a quality By-Name List, indicating that they have reliable real-time data. **To achieve the 10% below baseline milestone means that Moncton needed to reduce the number of people experiencing chronic homelessness by at least 10% (by 15 people to reach 132 people or less) for three consecutive months.**

Based on your most recent data submission, we are excited to recognize **Moncton has shown an 11% reduction in chronic homelessness!**

- You reached and sustained the 10% reduction milestone over October to December 2021.
- You reported 131 people experiencing chronic homelessness in December 2021, a reduction of 16 people or 11% percent between February 2021 and December 2021!

This is amazing!!! Your hard work and dedication to reaching functional zero for chronic homelessness is demonstrated by these impressive accomplishments.

Moncton is a leading community, proving to others that reductions in homelessness are possible. As the 5th community who has reached and is currently sustained this milestone, you are supporting the Canadian Alliance to End Homelessness goal of having 18 Canadian communities achieve 10% reduction in the journey to end chronic a homelessness by March 2024, as the first step to ending all homelessness in Canada.

The Built for Zero Canada team is very excited to continue to support you in the work needed to get to functional zero!

Congratulations and thank you for all your amazing work!

Onward!

Marie Morrison
